

# Third Party Website Implementation Checklist

The following has been provided by MemberClicks to facilitate accuracy when providing a third-party-designed template URL. You must be able to check every item here before the template is ready to be used by MemberClicks. If you are unsure, please check the *source code* of your template in a browser. Please contact MemberClicks if you have any questions.

## Subdomain:

A subdomain has been set up and pointed to the MemberClicks Server (add a CNAME record for the subdomain, pointing to your organization's weblinkconnect.com domain.)

## SSL Certificate:

An SSL certificate has been obtained and is being used

## The Templates:

All image references are absolute and secure (“https://siteurl/image.jpg”, instead of “/image.jpg”)

All JavaScript references are absolute and secure (“https://siteurl/script.js”, instead of “/script.js”)

All style references are absolute and secure (“https://siteurl/style.css”, instead of “/style.css”)

All links to other pages are absolute (“http://siteurl/page.html”, instead of “/page.html”)

No base href reference is being used (<base href="[[URL]]" />)

No forms are being used (except those being iframed)

The MemberClicks tags have been properly placed in the wide template

- <h1><!-- WebLink:ContentTitle--></h1>
- <!--WebLink:BodyContent1-->
